

Deae Representatives, Philo, age 89, and Carolyn, age 79, have had a Long Term Health Care Policy for over 20 years starting with Travelers into Brighthouse. When we signed up for the policies, the rates were to be the same for as long as we live. This was not the case. They have been raised several times since. Now we received the highest yet Change Notice in rates as follows: Philo Shelton: The semi-annual premium on his current long term care coverage will now increase beginning on December 28, 2021. If he keeps the same coverage his premium will increase from \$1,368.43 to \$2,395.13. Carolyn Shelton: The semi-annual premium on her current long term care coverage will now increase beginning on December 28, 2021. If she keeps the same coverage her premium will increase from \$664.74 to \$1,163.49. It's becoming a financial burden. We have paid so much into it. Thank you for your kind attention to this matter for all of us insured, Carolyn and Philo Shelton
